To Whom It May Concern:

Van Con General Contractors have done two projects for High Street United Methodist Church here in Springfield, Ohio during the period of 2009-2010.

Last year Van Con completed a sanctuary renovation project with extensive changes to the chancel and increased lighting throughout the sanctuary. We have a historical building in downtown Springfield and they were able to work with the historical commission as well as meet the unique challenges that come with this type of structure.

Van Con is currently completing a new handicap ramp for us, which includes extensive renovations to the exterior doors serving the ramp and installation of an ADA automatic opening system. The ramp design is perfectly integrated into the eastern façade of the church.

Van Con has done a beautiful job on both projects. The post-construction punch list is very short because the company seeks continual feedback on how they are doing as the work progresses on each phase. Their site supervisors are friendly, professional, and easily available to reach at any time.

As the chairperson of the High Street UMC Facilities Committee, I highly recommend Van Con General Contractors for any renovation or new construction.

If you desire to speak to me in person, I can be reached at 937-360-6717.

Sincerely,

Sam Poston
