To Whom It May Concern:

Van Con, Inc, has just completed the construction of our 120' X 80' warehouse/shop building and or 36' X 36' X 130'H. tower building for our most recent expansion. Our tower building was a unique structure that required special design and Van Con was very effective at communicating our requirements to the steel building vendor. Our schedule for the installation of our process equipment was very close to the completion schedule for the building. Any delay in the building construction would have set back our project completion schedule. Van Con was very cooperative in working with us to meet our schedule. We broke ground for our footer on 2/9/00 and we were able to begin our process equipment installation by 8/22/00. We met our projections and are right on schedule. Van Con has an excellent workforce and they ensure a safe work environment for their own people as well as their subcontractors. We are pleased with the job Van Con has done for us and would not hesitate to use them for any of our future expansion projects.

THANK YOU
