Sean Olson  
Vice-president, commercial construction

Sean,

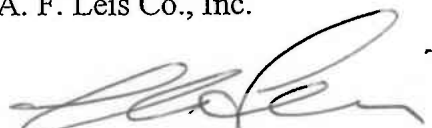

Now that you have completed construction of our new plant in Vandalia, it is only fitting that I make a few comments regarding this project.

As you know, this was an undertaking of major proportions from our prospective. From the outset, your input and guidance helped us to understand, from a construction point of view, what would be feasible and cost effective in relation to what we had determined as being our needs. At various times we presented you with challenging desires and your people never flinched or threw up their hands in disgust. Their attitude was always "get the job done, this is what is wanted". We enjoyed doing this from start to finish. With some adjustments along the way, it worked just as we had hoped.

I must say that this was a project well done and Van Con has earned our respect for integrity and effort. We will be looking forward to the day when we can call you and say "let's add on".

Sincerely,

A. F. Leis Co., Inc.

Charles Leis, CEO
